

My niece's body was pulled from the Kern River on August 4, 2020. The autopsy wasn't performed until August 20, 2020. The autopsy states advanced decomposition and blackened skin. I would like to point out that her skin is pale in the dash cam video.

**INVESTIGATIVE SUMMARY**

ADDITIONAL NARRATIVE ATTACHED ☐ YES ☒ NO

On August 4, 2020 at 1305 hours, a telephone call was received from Sergeant (Sgt.) Rick Dossey with the Bakersfield Police Department reporting a body that was found in the Kern River, east of the mouth of the canyon on Highway 178. He advised the Kern County Sheriff's Department Search and Rescue (SAR) was in the process of removing the decedent from the water.

I responded to the scene, arriving at 1402 hours. The scene was Highway 178, approximately 2 miles into the mouth of the Kern River Canyon. Mountains were to the south side of the roadway and a steep cliff descending to the river was to the north side of the highway.

**Kern County Sheriff/Coroner**  
**Final Report**

**2**

**MODE Undetermined**

**CASE # C02187-20**

**Master File**

**STATUS Autopsy**

**DEPUTY Brooke Hood**

I viewed the decedent, who was lying in a supine position inside of a black body bag. She was absent of all clothing. Black bands were present to both wrists. She had a dark metal heart shaped ring to her right hand and a white metal ring to her left hand. A red anklet was present to her left ankle. She was in moderate stages of decomposition, with extreme bloating, discoloration and skin slippage. Small cuts and abrasions were noted throughout her body.

Due to the condition of the decedent's hands, I was unable to obtain fingerprints. Her hands were placed in white evidence preservation bags. The body bag was shut and sealed using blue lock tab #038024 at 1435 hours, in the presence of Detective Keith Cason.

The decedent was transported to the Kern County Coroner's Office for a forensic examination.

On August 27, 2020 the decedent was positively identified through dental radiographs as Brynia Kayle Harris-Czubko, a 30-year-old Caucasian female from Bakersfield, California.

After completing an investigation in conjunction with the Bakersfield Police Department, the cause and manner of death for Brynia Kayle Harris-Czubko could not be determined.

**REPORT OF AUTOPSY**

**DECEDENT:** Brynia Kayle Harris-Czubko

**CASE:** C02187-20

**DATE OF EXAMINATION:** August 20, 2020

**TIME:** 0913-1040 Hours

**PERSONS PRESENT AT EXAMINATION:**

**Witnesses:** Bakersfield Police Department, Detective Frank McIntyre and Police Lab  
Technician Destinie Martinez

**Autopsy Assistants:** Ashely Lawrence and Ivon Valdez

---

**FINAL DIAGNOSES**

- I. Found floating in Kern River.
- II. Body decomposition, advanced state.
- III. No trauma found.
- IV. See toxicology report.

Circumstances: See investigator's report.

**COPY**

---

**CAUSE OF DEATH:** Undetermined.  
**MANNER OF DEATH:** Undetermined.

EXTERNAL EXAMINATION:

The body is received in a zippered body bag identified with a Kern County Coroner tag, C02187-20, Jane "Brylia" Doe, Investigator Hood. The body is that of an unembalmed, refrigerated, decomposed, adult Caucasian female who appears about the reported age of 30 years. The body weighs 112 pounds, measures 67½ inches, and is very well built and well nourished. The skin is free of significant scars. Tattoos are not present.

The body shows advanced decomposition changes. The hair is partially sloughed off from the scalp at the back of the head. There is a general black discoloration with skin slippage. Mud/dirt is seen over the entire body.

The head is normocephalic and is partially covered by long brown straight hair. The eyes are decomposed. Upper and lower teeth are present. There is no trauma in the oral cavity. The neck is unremarkable. There is no chest deformity. The abdomen is not unusual. The genitalia are those of an adult female. There is a tampon in the vagina. The external genitalia and anus are unremarkable. The extremities are unremarkable.

EVIDENCE OF TRAUMATIC INJURY:

None.

CLOTHING:

No clothing came with the body.

EVIDENCE OF THERAPEUTIC INTERVENTION:

None.

Note: The following observations are limited to findings other than injuries, if described above.

INITIAL INCISION:

The body cavities are entered through the standard coronal incision and the standard Y-shaped incision. No foreign material is present in the mouth, upper airway and trachea.

NECK:

The neck organs are layerwise dissected and removed en bloc with the tongue. No lesions are present. Both hyoid bone and larynx are intact and without fractures. No hemorrhage is present. The tongue when sectioned shows no trauma.

CHEST/ABDOMINAL CAVITY:

Both pleural cavities contain small amounts of dark brown decomposition fluid. The lungs are well expanded. Soft tissues of the thoracic and abdominal walls show decomposition changes. The subcutaneous fat of the abdominal wall measures 2 cm. The organs of the abdominal cavity have a normal arrangement, and none are absent. The peritoneal cavity is without evidence of peritonitis.

COPY

SYSTEMIC AND ORGAN REVIEW

MUSCULOSKELETAL SYSTEM:

No abnormalities of the bony framework or muscles are present.

CARDIOVASCULAR SYSTEM:

The aorta is elastic and of even caliber throughout, with vessels distributing normally from it. There is no atherosclerosis or aneurysm.

Within the pericardial sac, there is a small amount of brown fluid. The heart weighs 180 grams. It has a normal configuration. The right ventricle is 0.2 cm and the left ventricle 1.0 cm thick. The chambers are normally developed and without mural thrombosis. The valves are unremarkable. The myocardium is unremarkable. There are no defects of the septum. The great vessels enter and leave in a normal fashion. The coronary ostia are widely patent. There is a normal pattern of coronary artery distribution. There is no coronary atherosclerosis. There is no blood within the heart and large blood vessels.

RESPIRATORY SYSTEM:

A small amount of secretions is found in the lower bronchial and upper respiratory passages. The mucosa is unremarkable. The left lung weighs 240 grams and the right lung 240 grams. The pulmonary vasculature is without thromboembolism.

GASTROINTESTINAL SYSTEM:

The esophagus is intact throughout. The stomach is empty. The mucosa is unremarkable.

The small intestine and colon are unremarkable. The appendix is present. The pancreas is unremarkable.

HEPATOBIILIARY SYSTEM:

The liver weighs 620 grams. The capsule is intact. The parenchyma is soft. The gallbladder contains no bile and no calculi. The periportal lymph nodes are not enlarged.

URINARY SYSTEM:

The left kidney weighs 60 grams and the right kidney 60 grams. The kidneys are normally situated. The capsules strip easily revealing a surface that is smooth. The corticomedullary demarcation is preserved. The pyramids are not remarkable. The urinary bladder is unremarkable. It contains no urine.

GENITAL SYSTEM:

The ovaries are not identified. The fallopian tubes and the uterus are unremarkable. The cervix and vagina are unremarkable.

HEMOLYMPHATIC SYSTEM:

The spleen weighs 40 grams. The capsule is intact and thin. The parenchyma is decomposed.

ENDOCRINE SYSTEM:

The thyroid, adrenals and pituitary gland are unremarkable. The parathyroid glands are not identified. The thymus is unremarkable.

SPECIAL SENSES:

The eyes are not dissected. The middle and inner ears are not dissected.

HEAD AND CENTRAL NERVOUS SYSTEM:

There is no subcutaneous or subgaleal hemorrhage in the scalp. The external periosteum and dura mater are stripped showing no fractures of the calvarium or base of the skull. There are no tears of the dura mater. There is no epidural, subdural or subarachnoid hemorrhage.

The brain weighs 960 grams and is decomposed. Anatomic landmarks cannot be identified. There is no hemorrhage.

SPINAL CORD:

The spinal cord is not dissected.

HISTOLOGIC SECTIONS:

Representative sections from various organs are preserved in 10% formalin.

TOXICOLOGY:

Chest cavity fluid and liver have been collected. An expanded toxicology screen is requested.

PHOTOGRAPHY:

Photographs have been taken prior to and during the course of the autopsy.

RADIOLOGY:

None.

DIAGRAMS USED:

Diagram forms were used during the performance of the autopsy. The diagrams are not intended to be facsimiles.

WITNESSES:

Bakersfield Police Department, Detective Frank McIntyre and Police Lab Technician Destinie Martinez

AUTOPSY ASSISTANT(S):

Ashely Lawrence and Ivon Valdez

COPY

## OPINION:

The cause of death is undetermined. The decedent is found floating in the Kern River. The body shows an advanced state of decomposition. No traumatic injury is found at autopsy. Toxicology studies show ethanol, phenethylamine, cotinine and marijuana metabolites in the chest fluid specimen. The circumstances surrounding her death are not clear. The manner of death is classified as undetermined.

**Detailed Findings:**

Analysis and Comments	Result	Units	Rpt. Limit	Specimen Source	Analysis By
Ethanol	181	mg/dL	10	001 - Decomposition Fluid	Headspace GC
Beta-Phenethylamine	Positive	ng/mL	1200	001 - Decomposition Fluid	GC/MS
Cotinine	Positive	ng/mL	12	001 - Decomposition Fluid	GC/MS
Delta-9 Carboxy THC	7.0	ng/mL	5.0	001 - Decomposition Fluid	LC-MS/MS
Delta-9 THC	3.0	ng/mL	0.50	001 - Decomposition Fluid	LC-MS/MS
Ethanol	Confirmed	mg/dL	10	001 - Decomposition Fluid	Headspace GC

Other than the above findings, examination of the specimen(s) submitted did not reveal any positive findings of toxicological significance by procedures outlined in the accompanying Analysis Summary.

**Reference Comments:**

## 1. Beta-Phenethylamine (PEA) - Decomposition Fluid:

Beta-Phenethylamine is a decomposition product. The reported qualitative result for this substance was based upon a single analysis only. If confirmation testing is required please contact the laboratory.

## 2. Cotinine (Nicotine Metabolite) - Decomposition Fluid:

Cotinine is a metabolite of nicotine and may be encountered in the fluids and tissues of an individual as a result of tobacco exposure. Anabasine is a natural product occurring in tobacco, but not in pharmaceutical nicotine and a separate test for anabasine in urine can be used to distinguish tobacco from pharmaceutical nicotine use. The reported qualitative result for this substance is indicative of a finding commonly seen following typical use and is usually not toxicologically significant. If confirmation testing is required please contact the laboratory.

## 3. Delta-9 Carboxy THC (Inactive Metabolite) - Decomposition Fluid:

Delta-9-THC is the principle psychoactive ingredient of marijuana/hashish. Delta-9-carboxy-THC (THCC) is the inactive metabolite of THC.

## 4. Delta-9 THC (Active Ingredient of Marijuana) - Decomposition Fluid:

Delta-9-THC is the principle psychoactive ingredient of marijuana/hashish. Delta-9-carboxy-THC (THCC) is the inactive metabolite of THC.

## 5. Ethanol (Ethyl Alcohol) - Decomposition Fluid:

Ethyl alcohol (ethanol, drinking alcohol) is a central nervous system depressant and can cause effects such as impaired judgment, reduced alertness and impaired muscular coordination. Ethanol can also be a product of decomposition or degradation of biological samples.

**Sample Comments:**

001 \* Patient Name modified 09/11/20. Previous value: DOE, JANE B

001 Physician/Pathologist Name: Dr. Wang

001 Due to the nature of this specimen, some analytes may not be detected by GCMS Qualitative analysis.

Unless alternate arrangements are made by you, the remainder of the submitted specimens will be discarded one (1) year from the date of this report; and generated data will be discarded five (5) years from the date the analyses were performed.

**Analysis Summary and Reporting Limits:**

All of the following tests were performed for this case. For each test, the compounds listed were included in the scope. The Reporting Limit listed for each compound represents the lowest concentration of the compound that will be reported as being positive. If the compound is listed as None Detected, it is not present above the Reporting Limit. Please refer to the Positive Findings section of the report for those compounds that were identified as being present.
